

# TECHNICAL PROJECT MANAGEMENT IN A CONSULTING COMPANY

## CONTEXT

Gture is a digital services company based in Oslo. They assist companies in developing software, platform, web applications, mobile applications, and offer digital consultancy services. During my internship I joined the local team of project leaders, architects and designers, and worked with partners in Asia.

## COLLABORATIVE TOOLS

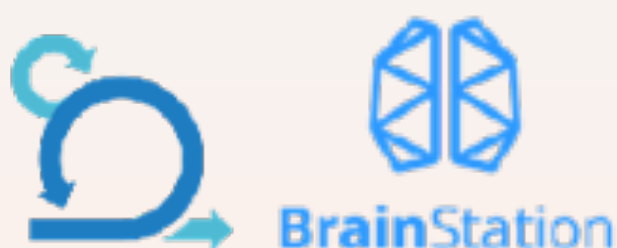

## 2 MAIN PROJECTS

- Cross-platform app development for a Norwegian IoT product. Working hand in hand with remote development partners for the backend side. [Project 1]
- Machine-learning oriented research project aiming to understand the client (a large multinational company) and their needs, and thus optimize the offer and pricing in the market. [Project 2]

## ACHIEVEMENTS

- Joined the local team and worked with remote development teams from Bangladesh and India
- Designed a cross-platform app prototype using **Adobe XD** [Project 1]
- Developed an app using the **ionic4** framework with **Angular** and **TypeScript** [Project 1]
- Data preprocessing using **Pandas** [Project 2]
- Developed and applied machine learning algorithms using **TensorFlow** and **SciKit** [Project 2]
- Displayed various datasets and results using **Plotly** and **Power BI** [Project 2]
- Conducted projects using **Agile** methods (sprints, daily stand-up...)

## DEVELOPMENT TOOLS

## RESULTS

[Project 1] We delivered a functional cross-platform app to the client.

[Project 2] I highlighted interesting insights from the data.

Overall, it was a valuable and rewarding international experience. A great adventure !
